

WHY ARE SHARKS IMPORTANT?

Across the world's oceans, there are over **500 species** of shark.

Whale shark

Goblin shark

They have inhabited our oceans for over **400 million years.**

Basking shark

Epaulette shark

Scalloped hammerhead

Catshark

Zebra shark

Tiger shark

Angel shark

Blue shark

Bonnethead

Some are **apex predators**, others are the **clean-up crew** of the ocean.

They help maintain a balance that keeps our **oceans healthy.**

foundation

WHY ARE SHARKS IMPORTANT?

As many as **273 million** sharks may be killed every year in commercial fisheries.

Many shark populations have **declined by more than 90%**, due to overfishing, climate change and habitat loss.

Losing sharks means the **delicate ecosystem balance** that they help maintain collapses.

Our future depends on sharks.

The ripple effects of an ocean without sharks will be far-reaching and potentially devastating.

AKOZ REKEN I ENPORTAN?

I annan plis ki **500 lespes** reken ki viv dan bann losean atraver lemonn.

Sagren

Reken gobelin

Zot in zabitan nou bann losean pour plis ki **400 milyon lannen.**

Reken pelerin

Reken epaulet

Martou rouz

Catshark

Landormi

Reken lanz

Demwazel

I annan parmi ki anler lo food chain – ki montre ki fason **bann differen lespes I depan lo lezot lespes pour zot manze**, tandis ki lezot I responsab pour netway losean.

Ansanm zot ede pour mentenir sa balans ki gard nou bann losean **an bonn sante.**

AKOZ REKEN I ENPORTAN?

Ziska **273 millyon** reken I kapab ganny touye tou le lannen dan lapas komersyal.

Plizyer popilasyon reken **in redwir par plis ki 90 %** akoz lapas pa kontrole, sanzman klima e osi kot zot perdi zot landrwa reste.

Par perdi reken I vedir ki nou riske perdi **sa balans delika dan lekosistenm** ki en parti I gras a bann reken.

Nou fitir I depan lo reken.

En losean san reken pour annan en lenpak sibstansyel, repetitive lo en tre gran lanpler e ki potansyelman tre destrikyiv.
