SMOOTH-HOUND SHARK

Gladde hondhaai

Mustelus mustelus

Max length: 164 cm

IUCN status: Endangered

Wide distribution

ILLUSTRATED BY

This shark is one of the 13 most common species found in False Bay, South Africa. The International Union for Conservation of Nature's (IUCN) Red List of Threatened Species (www.iucnredlist.org) indicates the global conservation status of a species.

In this colouring series, species are listed as having either a wide distribution or being endemic to Africa (which means the species is only found there).
