

HOW CAN WE HELP?

Use the power of your plate:

choose sustainably sourced seafood [eg. MSc certified].

Buy from bulk bins and store in jars

Carry your own reusable containers

Use matches instead of plastic lighters

Buy products in plastic-free packaging

Make your own cleaning products

Carry a reusable water bottle

Use reusable baby & menstrual products

We need to **change our habits: avoid single-use plastic, refuse** whenever you can, **reuse** what you have and **recycle** locally.

save our seas
foundation

HOW CAN WE HELP?

Avoid shark products. A single shark may be worth over **\$1 million** annually through tourism, but only **\$100** if fished for its meat. Where we spend our dollars decides how sharks are used.

Choosing reputable **eco-tour operators** keeps sharks alive, and often supports the **protected areas** that keep them safe.

Spread the word!

We are sharks' best allies. Share your passion and knowledge with your family and friends.

Together we can make a difference.
